SP 67/DKPU/OJK/IV/2026

PRESS RELEASE

OJK URGES PUBLIC TO UNDERSTAND FUNDAMENTAL DATA BEFORE INVESTING IN CRYPTO ASSETS

The Opening of the 2026 Crypto Literacy Month

Jakarta, 7 April 2026. Indonesia Financial Services Authority (OJK) and Indonesia Blockchain Association (ABI) held the 2026 Crypto Literacy Month to enhance public understanding and promote the responsible and informed use of digital financial assets, including crypto assets.

“Crypto transactions should be approached in a balanced manner, grounded in strong fundamental data analysis, so that we can better anticipate future opportunities,” Chief Executive of Financial Sector Technology Innovation, Digital Assets, and Crypto Assets Supervision of OJK Adi Budiarso conveyed during the opening of the 2026 Crypto Literacy Month (“BLK”) in Jakarta, Tuesday.

Adi views crypto assets trading activities as a real part of public economy activities, thereby requiring OJK to ensure the industry’s continuation through governance optimization and consumer protection.

Moreover, OJK sees crypto assets as the future of financial market that contributes to developments in Indonesia, particularly in tax revenue.

Based on the Directorate General of Taxation reports, crypto assets tax revenue amounted to Rp796.72 billion in 2025 and Rp1.96 trillion in February 2026, reflecting a strong upward trend.

Meanwhile, OJK recorded Rp482.23 trillion crypto assets transactions in 2025, a decrease from Rp640.61 trillion in 2024. The declining transaction value was triggered by combination of global factors and Crypto Market cycle.

Adi highlighted that Indonesia ranks 7th in the 2025 Global Crypto Adoption Index, indicating both high transaction volumes and widespread adoption among the public.

During the Crypto Literacy Month, Adi invited all parties to join hands in building a competitive and solid Indonesia digital financial assets ecosystems that is widely beneficial to the national economy.

Chairman of Indonesia Blockchain Association (ABI) Robby mentioned that the current digital financial assets industry has a solid foundation and is able to enter the global competition.

According to him, digital financial assets industry success is a testament of the operators’ collective efforts in ecosystems development, where industry’s direction under OJK must remain consistent in maintaining crypto assets ecosystems integrity in Indonesia.

The current crypto assets ecosystem in Indonesia is built on the three main pillars: the exchange as real-time transaction recording infrastructures, traders as the direct access point to the retail investors, and clearing and custodian as assets security guarantor for all crypto asset users in Indonesia. The pillars design each has distinctive functions and vital roles within the ecosystem.

The Crypto Literacy Month is a part of the continuous literacy programs consistently organized by OJK and ABI. The 2026 BLK will be held in several cities, such as Jakarta, Solo, Yogyakarta, and Manado.

The 2026 BLK is comprised of three main directed programs: Crypto Literacy Month for the public, Blockchain Literacy Month for university students, academicians, and developers, as well as Crypto Literacy Month for law enforcement apparatus.

Based on industry developments, crypto assets trading activities showed significant progresses. Throughout 2025, crypto assets transaction value amounted to Rp482.23 trillion. Consumer accounts reached 21.07 million in February 2026, reflecting growing public participation throughout the ecosystem development.

Member of Commission XI of DPR RI Eric Hermawan and Head of Commodity Futures Trading Regulatory Agency (Bappebti) Tirta Karma Senjaya and Digital Financial Assets/Crypto Assets industry players also attended the opening event.
